

AirBoss 100™ Sizing Guide

1 Measure Face

FACE WIDTH

FACE LENGTH

Recommended measuring devices include the types of calipers shown here. Utilizing a ruler, tape measure, or another measuring device may result in a less accurate measurement and ordering the wrong mask size.

2 Determine Mask Size

This sizing guide will aid in the selection of an appropriate mask size. Sizes are based on a sample population. Maintaining a proper seal is important to maximize protection. Refer to the AirBoss 100 official User Instructions for guidance.

Facial hair may affect sealing of product. ADG recommends less than 24 hour growth for optimal sealing.
