

The Sentinel Max Level 2 Isolation Gown

These full-coverage, single-use, non-sterile, non-surgical isolation gowns are intended to protect patients and healthcare personnel from the transfer of microorganisms, bodily fluids, and particulate material. Two size options are available to ensure a proper fit. All gowns are 100% sourced and manufactured in the United States of America.

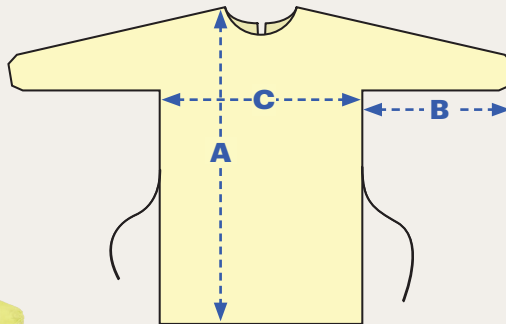

ADG in collaboration with Maddox Defense is proud to offer this 100% sourced and made in the USA isolation gown.

User Instructions

The Sentinel Max Level 2 Isolation Gown

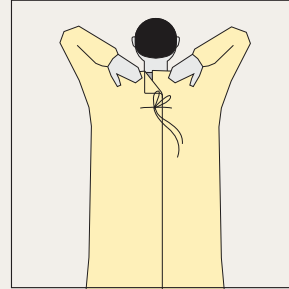

Donning

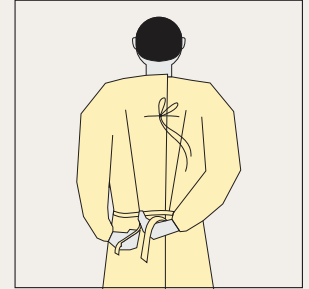

1. Begin by opening the gown. Hold the gown away from the body and allow it to unfold completely.

2. Slip both arms into the sleeve and hands through the elastic cuff. Adjust the front of the gown to fully cover the torso and expose the full back of the gown. Pull out wrinkles and make sure the gown is smooth on your back.

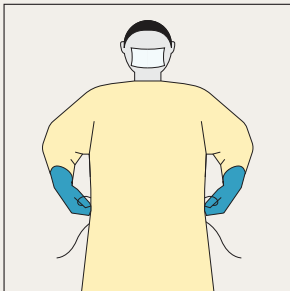

3. Reach behind the neck to grab the ties. To ensure full coverage, make sure the layers are overlapping without a gap. Firmly tie the back of the gown together.

4. Grasp the rear waist ties and securely tie the gown together while ensuring there is overlap of the gown.

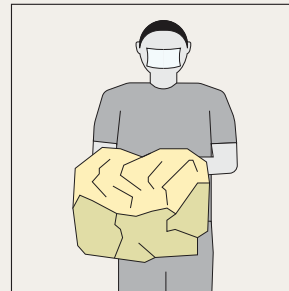

Doffing

1. To remove the gown, insert your thumbs between the ties and the gown and pull forward to break the ties, touching the outside of the gown only with gloved hands.

2. With both hands grasp the gown in the front from the waist away from your body.

3. While removing the gown, fold or roll the gown inside-out into a bundle.

4. As you are removing the gown, peel off your gloves at the same time, only touching the inside of the gloves and gown with your bare hands. Place the gown and gloves into a waste container.

If the end user has questions concerning the safe operation of this product, please consult the local supervisor or safety program administrator.
